- Clear written and oral communication
- Report writing and proposals
- Teamwork and leadership
- Works well with minimal supervision
- Adapts across cultures

PROFILE

Graduate teacher and self-taught full stack developer based in Dar es Salaam. I build school websites, management systems and Android apps for schools, associations and small businesses, and I bring a teacher's habits to software: clear structure, plain language and a focus on the people using it. Comfortable working independently and turning a real-world problem into a working tool.

SELECTED PROJECTS

Malela Secondary School website

Public school website with institutional information and content. Live at malelasec.com.

MultiBiz (Android)

Offline business manager for one or many businesses: sales, stock, purchases, expenses, customers, suppliers, debts, employees and reports. Available in Kiswahili, English and Arabic.

Scanika Finance / Mapato na Matumizi (Android)

Offline personal finance app with income and expense records, daily, weekly and monthly reports, and backup and restore.

Scanika Digital Cards

Digital invitation cards for events. Live at malelasec.com/mialiko.

UDOMSA SRM

Student records management system for a university association (PHP and MySQL).
